

Incorrect	Correct
 Risk of torsion and kinking X	 Correct rolling up and unrolling ✓
 Susceptible to torsion and kinking X	 Correct rolling up and unrolling ✓
 Kinking directly behind the coupling X	 Maintain a minimum unloaded straight section of 5 times the nominal diameter ✓
 Excessive bending behind couplings and exceeding the bend radius X	 Use an elbow fitting and install the hose in a U-shape ✓
 Sagging; excessive bending behind the coupling X	 Provide support ✓
 Axial load X	 Use an elbow fitting and install the hose in a U-shape ✓
 Torsion X	 Align the connection in a straight line ✓
